Who We Are?

Founded in 2013 with 100% local capital, vMind is at the forefront of digital transformation in Turkey, offering end-to-end IT solutions. With its own cloud brand, portvMind, and professional managed services, vMind stands out by delivering tailored solutions that meet the evolving technological needs of businesses.

Our Value Proposal

vMind has strong references in 22 different sectors including national, international, SME or various scale companies and public institutions. Thanks to its transparent customer relationship management, strong business ecosystem, innovative approach and strong technical team with international experience, it can meet up to 90% of IT workloads of companies on their digitalization journey without needing anyone else.
